

# What is GreenScene®

*For over 20 years Protech has been a leading designer and manufacturer of theatrical stage equipment with award-winning designs. Protech has now created a “green business culture” dedicated to finding eco-friendly solutions to serve the needs of the entertainment industry. GreenScene® — because the planet matters.*

GreenScene® is proud to offer a complete and growing line of ecologically sound Theatre Equipment. Our product line began with Counterweight Rigging hardware and manually operated Stage Tracks because man power has no carbon footprint. When you buy products that bear the GreenScene® brand, you're not just sourcing the finest theatre equipment available, you're also casting a dollar vote for sustainability by re-using materials that would otherwise go to waste. Either way, you're helping conserve the planet through responsible purchasing.

GreenScene® is a National Member of the US Green Building Council which supports Leadership in Energy and Environmental Design (LEED). LEED, through its rating system, encourages and accelerates global adoption of sustainable green building and development. GreenScene® products may be considered under MR Credit 4: Recycled content and future waste minimization.

***We're excited to introduce the industry to our line of eco-friendly products.***
